WEALTH, PROTECTION & TAXATION

“IPS Expands To Help Clients Create & Protect Wealth”

Leading Gold Coast-based accounting practice, International Professional Services Pty Ltd (IPS) has expanded its offices on the 11th floor of Australia Fair at Southport by 226sq.m., to take over more than 570sq.m. overlooking the Broadwater.

IPS has grown from a small team in 1993, occupying serviced offices, to a flourishing practice today with nine related companies covering various industries under its umbrella, and with a team of 30 accounting, administration and business advisors.

The company originally held 150sq.m. at Australia Fair in 1994 and has since expanded its headquarters twice.

International Professional Service's key client base extends throughout the Gold and Sunshine Coasts, Brisbane, Sydney and Melbourne.

Managing Director John Illingworth, said yesterday the company's philosophy was to find solutions for Clients rather than just selling time.

He said IPS had developed a list of unique features that differentiated it from other accounting and business consulting practices. This had played a key role in the company's success.

He said the winning IPS formula was in its ability to provide a comprehensive range of solutions for Clients, delivered by a brilliant team of advisors.

“We are committed to in-depth training and development programmes that have ensured the IPS companies are industry leaders.”

The companies specialise in accounting, taxation, wealth creation and protection, audit, superannuation, financial planning, training seminars and bookkeeping.

“Client needs can seldom be met by a single approach. We have put a winning team together to provide immediate access to a range of resources at one convenient location.

“A comprehensive approach is definitely the way of the future. IPS looks at the big picture to determine what needs to be done to develop Client wealth and protect it now and beyond generations.”
